Description / Ref

Mercedes Benz 250 G Wagon - 40163

Photo (a gallery of photos is provided below - where available)

Details

Mercedes Benz 250 G Wagon. We have recently received a batch of these vehicles from the military which are all in excellent condition with low kilometres

Vehicle specification:

The ,G' in the name is short for Geländewagen (or cross-country vehicle / tough terrain vehicle) and was Mercedes's first venture into general four-wheel drives

The vehicle has a folding hood, removable side flaps and a folding windscreen.

The same frame design is used for both short and long wheelbase versions. They have closed box shaped side members in conjunction with tubular cross members, providing high bending and torsional stiffness in a ladder type frame to which the noise insulated bodywork is attached by rubber mountings. The frame is corrosion protected and is also waxed and sealed.

Engine output is transmitted to the wheels using an all synchromesh five speed manual gearbox and a two shaft transfer case. The four wheel drive can be engaged when the vehicle is either stationary or moving. The cross country ratio can be engaged and disengaged when driving, to double the power to the wheels and reduce speed by half. The 100 per cent locking differentials on the front and rear axles can be engaged and disengaged individually during travel.

Payload for the 250GD version is 700 Kg's

Wheelbase; 2.4 M

Ground Clearance: 0.24 M

Fuel capacity: approx 96 litres

Max gradient: 80%

Fording: 0.6 M

Power assisted steering

Videos (if available)

Category	Mercedes G Wagons	Length	4.5M
Manufacturer	Mercedes	Height	1.85M
Engine	OM602 92 HP 2.5 litre diesel	Width	1.7M
